

BARIATRIC

Bariatric Mattress

Bariatric Mattress

A foam support surface aids in the prevention and management of pressure injury. Pressure, shear, friction and moisture are all contributing factors effecting skin integrity.

Top Cover Specification:

- Vapour Permeable
- Multi directional elasticity
- Waterproof
- Antibacterial
- BS 6807 ignition source 5
- BS 7175 ignition source 5
- Fully welded with zip (4 sides) and waterfall flaps
- 2 years guarantee on fabric if maintained correctly
- Care instructions on mattress cover

Base Cover Specification:

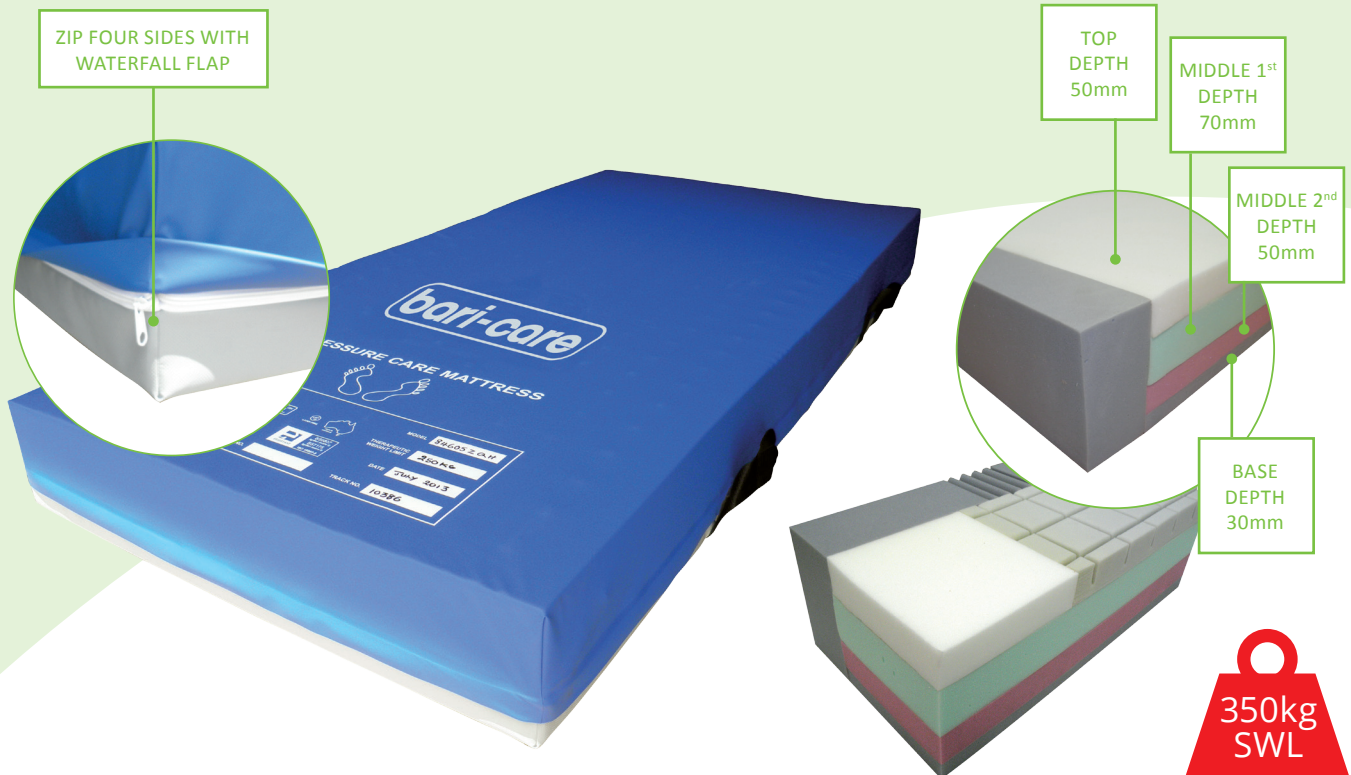

- Grey vinyl non slip for durability and longevity
- Carry handles attached to base cover

Foam Specification:

- The Bariatric Mattress has been designed using hospital grade foams in all four layers. Density, hardness and depth played a major role in this decision.
- Top surface under the torso has been castellated. Increasing surface contact area and potentially reducing risk factor while the heel section has a memory foam insert.

Foam Properties:

- This surface has side rails with a hinging system for stability and flexibility.
- All foams meet Australian Standards and are treated with an antimicrobial agent which guards against a variety of microbes.
- 5 years guarantee on foam.
