## Sizewise Shuttle B Series™

### Sizewise Shuttle B Series™

The Shuttle B Series™ is the ultimate transitional item designed for use in conjunction with rehabilitation, examination, and transportation.

Whether in stretcher or chair position, this fully electric product accommodates weight capacities up to 454kg. The Shuttle B Series™ transforms with the touch of a button from stretcher to chair position and is perfect for use with a lateral transfer device to assist with ambulating a patient. The seat assist function is complete with ambulation poles for the safety and confidence of the patient and caregiver. The seat has a three layer foam insert for further comfort and weight distribution and leg supports elevate independently with retractable foot rests.
