Safetec® RedZ® Spill Control Solidifier

Safetec® RedZ® Spill Control Solidifier

Red Z® is a fast and effective way to solidify and deodorise potentially infectious blood and body fluids. The unique immobilisation technology makes Red Z® one of the leading spill control solution in the industry.

29.57ml (1oz) solidifies over one litre of water-based fluid.

The Z-line of solidifiers are one of the fastest solidifiers on the market, with the ability of absorbing twice the amount of fluid in the same amount of time, whereas some competitors fail to solidify completely, even after 10 minutes.*

*Comparisons based on the time for 45g of each product to completely solidify 2,000 cc's of 0.9% NaCl at 25°C

Red Z® Zafety Pac

The **Red Z® Zafety Pacs** are a pre-measured unit dose pack that has a multitude of uses. The porous, non-woven material (similar to a teabag) allows liquid and the solidifier to mix, with no pouring necessary.

Absorbs up to 37.5cc of Blood/Urine and 70cc of Water.

Safetec® Zorb sheets

Safetec® Zorb sheets are tissue based papers containing super absorbent polymers.

Use **Safetec® Zorb** sheets to help keep your employees and the public safe, as well as in compliance with the many regulations for packaging and transportation of diagnostic specimens, biological materials, and other dangerous goods.

Whether your application is in a laboratory, medical office, or funeral parlor, **Safetec® Zorbs** are the perfect solution for your biohazard containment needs.

Absorbs up to 18cc of Blood/Urine and 60cc of Water.
