

BARIATRIC XXL-Rehab Stand Tall Walker

XXL-Rehab Stand Tall Walker

The XXL-Rehab Stand Tall Walker is a multi-functional aid; It can be used for walking, mobilising from seated to standing, it is safe to use, gives independence and has an IV option.

The XXL-Rehab Stand Tall Walker has 2 built-in handgrips on the side which allow the user to stand up in small steps from the bed or chair being in full control of the situation. This minimises the risk of falling and therefore also minimises the risk of injury to caregiver or patient himself. Once upright the user can walk around.

The underarm-padding is adjustable in width and angle giving optimal support to the user. This function is supported in full length of the bar.

In addition, it has many handgrip-combinations and easy adjustment, everything to make the XXL-Rehab Stand Tall Walker easy to maneuver.

The brakes are mounted onto the bar, useful in stops of course, but also in speed control and turning: the XXL-Rehab Stand Tall Walker is a safe zone. The brakes can be locked, i.e. when getting up/sitting down.

Using 32 mm tubing ensures an almost forever lasting frame, but also gives a much more simple look and it can be cleaned in few seconds.

IV holder and holder for urine-bag are optional.

The XXL-Rehab Stand Tall Walker is mainly designed for hospital use, but can be used at home as well.
