

CLINICAL FURNITURE

Stretchair

Stretchair helps to reduce risk by having one versatile transport chair that travels from admitting to any location in the facility and effortlessly converts to a height-equalising stretcher for safer patient transfers.

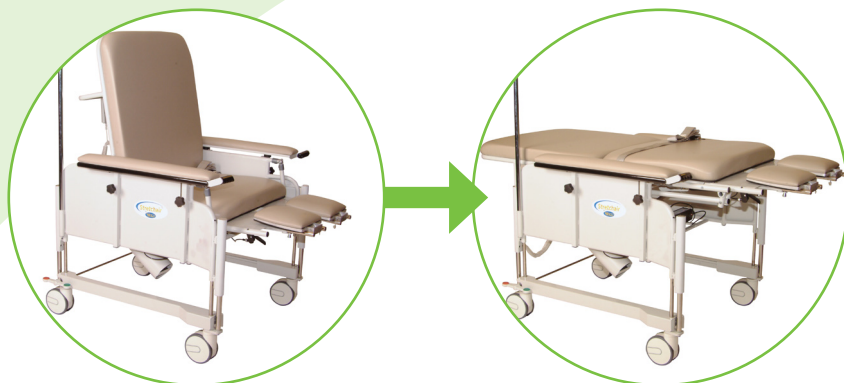

Stretchair

- Powered patient positioning lessens potential for caregiver's strain.
- Adjustable vertical height equalises surfaces, allowing safer patient transfer.
- Provides practical mobility and maneuverability for patients up to 453kg.
- Reduces patient anxiety experienced with other lift and transfer devices.

With Stretchair, patient admission, transport, recovery and discharge activities can all take place in the same unit enhancing throughput, reducing patient transfers and limiting patient and staff opportunities for injury.

Features:

- Lay-flat height adjustable positioning for safer patient transfer
- Flip-up footrest
- Independent legrest
- Adjustable height footrest
- 20cm vertical lift
- On-board rechargeable battery-operation
- Up to 453kg capacity
- Seat width up to 78cm

Stretchair offers safe patient transport, lateral transfer aid and power vertical lift. Use as a rehabilitation chair, orthopaedic chair, cardiac chair, geriatric chair or for bariatric patients.
